DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Klaassen.

There is disclosed in Klaassen a device for injecting liquid, the device comprising: a cylinder operated pump arrangement 25, 32, 33 adapted to receive an injecting liquid from a supply 27, and a head 4 having apertures 10 for nozzles, the head being in fluid communication with the pump arrangement. The pump arrangement is adjustable so as to provide varied pressure and spray velocity (col. 3, lines 61-66). Thus, the pump arrangement can be considered a "booster pump".

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Klaassen in view of Townsend.

Townsend discloses that it is known in the art to provide an injection fluid filter 252 positioned at the inlet of a pump 256. It would have been obvious to one skilled in the art to provide the device of Klaassen with a filter as taught by Townsend, in order to filter the injection fluid.

Allowable Subject Matter

Claims 5-7 and 10-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed December 6, 2002 have been fully considered but they are not persuasive. It should be noted that the Examiner considers the hydraulic pump arrangement of Klaassen to be the equivalent of Applicants "booster pump" (see comments in rejection above).
